

YÜRÜTÜCÜ İŞLEVLER

GÖRSEL ile TOPLAMA

1

Yürütücü işlevler, beynin "yönetim merkezi" veya "CEO'su" olarak görev yapan üst düzey bilişsel beceriler bütünüdür. Planlama yapma, organize olma, bir göreve başlama, dürtüleri kontrol etme, zamanı yönetme ve zihinsel esneklik gibi hayati becerileri içerir. Öğrenme ve günlük yaşamdaki başarı, bu işlevlerin ne kadar verimli çalıştığıyla doğrudan ilişkilidir.
